Further it is mandatory for every learner to have min 50% attendance for each course & average attendance has to be 75%.
- The same ratio shall be applied for 3) computing the attendance of the learners by crediting the number of periods which are missed while participating in an extracurricular/coactivity/competition/camp/ curricular workshop/convention/symposium/ seminar etc. where the said learner is officially representing the college/ University/ District/ State/ Country with the permission of the Principal /Director/ Head of the College/ Institute/ University Department or by the direction of the University Officer as the case may be wherein for the purpose of computing the average attendance the periods missed for what is envisaged here-in above, at Sr. No 2, shall be deemed to have been attended by the said learner .

The respective committees shall convey their decisions to the controller of examinations which shall be final and binding on the learners once accepted and communicated by the controller of examinations.

Implementation of the Ordinances 6086 by the College:

- 1. Attendance is taken in every period. The programming of the attendance in the computer is such that it records presence and absence of only those periods where the attendance is actually called out i.e. if attendance is not taken in a particular period, then the question of students loosing the attendance for that period does not arise since the computer does not add that period to the total periods for the purpose of attendance. For instance, if attendance is taken, say only for four periods out of six on a particular day, only four periods are added to the total that day and the presence and absence at those periods is recorded accordingly.
- If a student's attendance record and / or 2. academic performance is not satisfactory, he or she will not be admitted in the II term and the admission will be cancelled. High Court Order : The Bombay High Court in its Order dated 21* February, 2000, upheld the attendance system of the College while dismissing the Petition filed by the detained SYJC students. The High Court observed that the students should not rush to the Court at the last moment and acts of indiscipline among them should not be accepted. High Court Judgment : The Bombay High Court in its landmark judgment on 5th July, 2002, passed in the appeal filed by the Principal of this College against the order of the City Civil Court, upheld our system of enforcing the attendance and campus discipline. The Judgment serves as a reference on attendance and campus discipline for all time to come. The Court held that the attendance should be counted in each term separately and that the attendance of the first and second terms cannot be clubbed to work out the aggregate attendance. The Court also held that the Principal is the final authority in enforcing discipline in the campus. The Bombay High Court t in its order dated 27* February, 2008, rejected a detained student's write petition making false claim that she was suffering from a chronic disease and summoned the doctor who issued the fake certificate. The court has upheld the college system of enforcing attendance and disciplines the fourth time,

- Stock Checking Committee
- → Canteen Committee
- Enforcement of Attendance:

Our college is a pioneer institute in introducing the computerised attendance system. The computerised defaulters lists are displayed division wise regularly at the end of every month on the Students Notice Board.

The students failing to fulfil the required attendance shall be DETAINED and shall not be permitted to take the Annual / Board examination. Warning letters from the Principal written to Parents of the defaulting students are given to the concerned students by the class teachers in the classrooms. The students must hand over these warning letters to their parents. Students should note that fulfilling the attendance requirement alone will not qualify them to appear for the examination. Their academic performance should also be to the satisfaction of the principal.

Note

- Attendance is taken in every period. The programming of the attendance in the computer is such that it records presence and absence of only those periods where the attendance is actually called out i.e. if attendance is not taken in a particular period, then the question of students loosing the attendance for that period does not arise since the computer does not add that period to the total periods for the purpose of attendance. For instance, if attendance is taken, say only for four periods out of six on a particular day, only four periods are added to the total that day and the presence and absence at those periods is recorded accordingly.
- 2. If a student's attendance record and / or academic performance is not satisfactory, he or she will not be admitted in the II term and the admission will be cancelled.

The Court held that the attendance should be counted in each term separately and that the attendance of the first and second terms cannot be clubbed to work out the aggregate attendance. The Court also held that the Principal is the final authority in enforcing discipline in the campus.
