REPORT: - Workshop on 'Data Analysis & Interpretations Using SPSS'

During graduation students are required to submit varieties of assignments for internal or external evaluation. The students are required to collect, format and analyse the data. This workshop will train the students in completing these assignments and presenting the data more effectively using SPSS software. SPSS (Statistical Package for the Social Sciences), software package used for the analysis of statistical data. It has applications in many fields such as market researchers many organizations, education researchers and government. It includes Descriptive, Bivariate statistics, Prediction for numeral outcomes and Prediction for identifying groups. Using SPSS software students will learn applications for different data types and which one is the appropriate one.

Different software can be used for Data Analysis & Interpretations. It is used for purposes of market research or financial planning by analysing statistical, scientific, medical, and economic data. The objective and Outcomes of the workshop is to train the students: How to use SPSS for Data Analysis & Interpretations with the outcome that Students will be able to use SPSS for Data Analysis & Interpretations. In all 27 students attended the workshop, of which 14 were male and 13 were Female. Dr Sanjay Mishra had conducted the workshop for students.
